1 I. QUALIFICATIONS AND PURPOSE OF TESTIMONY

2	O.	PLEASE STATE	YOUR NAME.	OCCUPATION	AND	BUSINESS	ADDRESS

- 3 A. My name is Dr. August H. Ankum. I am a Senior Vice President at QSI Consulting, Inc.
- 4 My business address is 1027 Arch, Suite 304, Philadelphia, PA 19107.

5 Q. WHAT IS QSI CONSULTING, INC.?

- 6 A. QSI Consulting, Inc. ("QSI") is a consulting firm specializing in traditional and non-
- 7 traditional utility industries, economic and econometric analysis and computer aided
- 8 modeling. QSI provides consulting services for regulated utilities, competitive providers,
- 9 government agencies (including public utility commissions) and industry organizations.

10 Q. PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND WORK

- 11 EXPERIENCE.
- 12 A. I received a Ph.D. in Economics from the University of Texas at Austin in 1992, an M.A.
- in Economics from the University of Texas at Austin in 1987, and a B.A. in Economics
- from Quincy College, Illinois, in 1982.
- My professional background covers work experiences in private industry and at state
- regulatory agencies. As a consultant, I have worked with large companies, such as
- 17 AT&T, AT&T Wireless, Bell Canada and MCI WorldCom ("MCIW"), as well as with
- smaller carriers, including a variety of competitive local exchange carriers ("CLECs")
- 19 and wireless carriers. I have worked on many of the arbitration proceedings between new

entrants and incumbent local exchange carriers ("ILECs"). Specifically, I have been involved in arbitrations between new entrants and NYNEX, Bell Atlantic, USWEST, BellSouth, Ameritech, SBC, GTE and Puerto Rico Telephone. Prior to practicing as a telecommunications consultant, I worked for MCI Telecommunications Corporation ("MCI") as a senior economist. At MCI, I provided expert witness testimony and conducted economic analyses for internal purposes. Before I joined MCI in early 1995, I worked for Teleport Communications Group, Inc. ("TCG"), as a Manager in the Regulatory and External Affairs Division. In this capacity, I testified on behalf of TCG in proceedings concerning local exchange competition issues, such as Ameritech's Customer First proceeding in Illinois. From 1986 until early 1994, I was employed as an economist by the Public Utility Commission of Texas ("PUCT") where I worked on a variety of electric power and telecommunications issues. During my last year at the PUCT, I held the position of chief economist. Prior to joining the PUCT, I taught undergraduate courses in economics as an Assistant Instructor at the University of Texas from 1984 to 1986. A list of proceedings in which I have filed testimony is attached hereto as Exhibit AA-1.

Q. ON WHOSE BEHALF WAS THIS TESTIMONY PREPARED?

9

10

11

12

13

14

15

16

17

18 A. This testimony was prepared on behalf of Eschelon Telecom, Inc., XO Communications
19 Services, Inc., Granite Telecommunications, LLC, and ACN Communication Services,
20 Inc. ("Joint CLECs.")

1 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?

A. The purpose of this testimony is to address issues raised by Qwest¹ witnesses Hensley

Eckert, Weisman, and Canfield. Specifically, I will rebut Qwest's claims that the Joint

CLECs have harmed Qwest by charging it Commission approved just and reasonable

rates. Further, I will show that Qwest's testimony is flawed for a number of reasons and

that its alleged "damages" calculations are unsupported by economic theory and

otherwise erroneous.

8 Q. DO YOU HAVE A PRELIMINARY OBSERVATION?

9 A. Yes. Both the FCC and the Commission rules envision that CLECs engage in off-tariff agreements,² so it is difficult to see how the existence of such off-tariff agreements can come as a surprise or could be discriminatory.

Further, the Commission's own rules, either under Option One or Option Two regulation, contemplate that CLECs would be allowed to engage in off-tariff agreements.³ While under Option One, off-tariff agreements have to be filed with the Commission, under the latter, CLECs do not have to file off-tariff agreements. Thus, even *if* it is determined that the Joint CLECs failed to abide by the Commission's rules, their primary infraction would be that they did not file the agreements at issue. In other words, under the

12

13

14

15

16

17

I will generally use the name Qwest as a short hand to refer to the parent company and/or QCC. Further, it is useful for the purposes at hand to view Qwest and QCC as a one vertically integrated firm.

In the Matter of Access Charge Reform, Seventh Report and Order and Further Notice of Proposed Rulemaking, CC Docket No. 96-262; FCC 01-146, April 27, 2001 ("FCC's 2001 Order"), and Commission rules 723.2203.

³ Commission rules 723,2203.

1		Commission rules there is nothing discriminatory or inappropriate about CLECs entering
2		into off tariff agreements, it is just that they did not file them when perhaps they should
3		have.
4		Next, Qwest has no basis for asserting that had it known about the agreements it could
5		have availed itself of lower rates. To be sure, the CLECs were under no obligation to
6		give Qwest rates lower than the tariffed rates. Thus, even if the Commission were to
7		find that the CLECs did not comply with certain filing rules, such failure to file certain
8		agreements still did not cause Qwest damages.
9 10 11 12	II.	FEDERAL AND STATE REGULATIONS ENVISION AND PROVIDE FOR OFF-TARIFF AGREEMENTS BETWEEN CLECS AND IXCS – THEY ARE NOT DISCRIMINATORY – AND THERE EXISTENCE IS NO SURPRISE
13	a)	Federal and State Regulations Envision and Provide for Off-Tariff Agreements
14	Q.	HAS QWEST BEEN CHARGED JUST AD REASONABLE RATES?
15	A.	Yes. Qwest has been charged rates in tariffs on file with the Commission and, as such,
16		those rates are just and reasonable.
	_	
17	Q.	HAS QWEST BEEN CHARGED ACCESS RATES HIGHER THAN THOSE
18		PROVIDED FOR IN THE TARIFFS?
19	A.	No, Qwest has not been charged access rates higher than those provided for in the tariffs.
20		And Qwest has made no such claim.

1	Q.	HAS QWEST OTHERWISE BEEN OVERCHARGED?
2	A.	No, to my knowledge, Qwest has not been overcharged. ⁴ Again, Qwest has been charged
3		tariffed rates that are just and reasonable.
4	Q.	TO THE EXTENT THAT THE JOINT CLECS EXTENDED OFF-TARIFF
5		AGREEMENTS TO OTHER CARRIERS, ARE SUCH OFF-TARIFF
6		AGREEMENTS AT ODDS WITH FEDERAL AND STATE REGULATIONS?
7	A.	No, both federal and state regulations envision and provide for off-tariff agreements.
8		i. The FCC Envisioned and Encouraged that CLECs Would Negotiate Off-Tariff Agreements with IXCs
10	Q.	DID THE FCC ENVISION IN ITS 2001 ORDER THAT CLECS WOULD BE
11		NEGOTIATING OFF-TARIFF AGREEMENTS WITH IXCS?
12	A.	Yes. As noted, Qwest relies primarily on the FCC's 2001 7 th Report and Order (CC 96-
13		262) for its contention that CLECs control bottleneck facilities. However, the FCC in the
14		same order made clear that CLECs were free to negotiate access rates, terms and
15		conditions with IXCs and that CLEC's could both tariff access charges and offer off-tariff
16		rates via agreements:
17 18 19 20		In addition, by permitting CLECs to decide whether to tariff within the safe harbor or to negotiate terms for their services, we allow CLECs additional flexibility in setting their rates and the amount that they receive for their access services (¶55, see also¶¶s 3, 4,5 etc.)
21		[]
		With the Control of t

I am not addressing here any incidental billing disputes Qwest may have with individual CLECs.

1 Additionally, we expect that our benchmark rule will have no effect on 2 negotiated contracts, under which CLECs have chosen to charge even 3 more favorable access rates to particular IXCs. Rather, these contracts 4 will remain in place and the participating IXCs will continue to be entitled to any lower access rates for which they provide. (¶57) 5 6 Clearly the FCC did not believe that negotiated access rates, in combination with tariffed 7 rates, was discriminatory or problematic for any other reason as it encouraged a 8 combination of both tariffs and agreements. 9 ii. This Commission's Rules Provide for Off-Tariff Agreements 10 YOU HAVE ALREADY DISCUSSED THAT THE FCC ENVISIONED THAT O. 11 CLECS WOULD NEGOTIATE OFF-TARIFF AGREEMENTS WITH IXCS. DO 12 THE COLORADO COMMISSION'S RULES LIKEWISE ENVISION SUCH OFF-13 **TARIFF AGREEMENTS?** 14 Yes. Commission's rules - 723.2203(d) explicitly anticipate that CLECs will have the A. 15 latitude necessary to negotiate off-tariff agreements without the need to file those 16 agreements with the Commission. This provision makes perfect sense given that CLECs, 17 by definition, compete for each of the services they provide to each customer, including 18 IXCs, and as such, they need flexibility to negotiate. Again, the FCC, like this 19 Commission, recognized in its 2001 Order that such negotiations of off-tariff agreements 20 would be appropriate. Q. DO OTHER COMMISSION RULES ALSO ENVISION THAT CLECS BE 21 22 **NEGOTIATING OFF-TARIFF AGREEMENTS?**

1	A.	Yes. Commission rules 723.2203(c). While Commission rules 723.2203(c) require that
2		such agreements be filed, they envision and certainly do not prohibit that CLECs
3		negotiate agreements with access customers.
4	Q.	IS QWEST HARMED IF CLECS ARE REMISS IN FILING OFF-TARIFFS
5		AGREEMENTS WITH THE COMMISSION?
6	A.	No, while it is important that carriers follow Commission rules, failure in this regard
7		does not necessarily constitute harm to any other third party, such as Qwest. Under the
8		Commission rule 723.2203(c), CLECs may elect Option One or Option Two:
9 10 11 12 13 14 15 16 17 18		A CLEC may elect to opt into one of two forms of default regulation in their entirety. A new CLEC shall designate at the time of application for a CPCN and/or LOR under which form of default regulation it requests to be regulated or apply for an alternative form of regulation pursuant to rule 2205. An existing CLEC certified at the effective date of this rule shall notify the Commission by letter addressed to the Director of the Commission if they wish to change to the Option Two form of default regulation. If an existing carrier desires to be regulated under an alternative form of regulation, this must still be accomplished by application pursuant to rule 2205. (Emphasis added.)
19		Clearly, if CLECs had elected Option Two, there would have been <i>no requirement</i> to file
20		any off-tariff agreements and Qwest would have been in the same position it is now.
21		That is, CLECs were free to enter into such agreements; they simply did not file them.
22		Qwest has no basis for asserting that had it known about the agreements it could have
23		availed itself of the same rates. The CLECs were under no obligation to give Qwest the
24		same rates. Thus, even if the Commission were to find CLEC non-compliance with

1		certain filing rules, such failure to file certain agreements still did not cause Qwest
2		damages.
3		b) The Existence of Off-Tariff Agreements Should Be no Surprise
4	Q.	DOES QWEST COMPLAIN IT DID NOT KNOW ABOUT THE OFF-TARIFF
5		AGREEMENTS BETWEEN CERTAIN IXCS AND THE JOINT CLECS?
6	A.	Yes. Qwest complains that it did not know that there were off-tariff agreements between
7		the Joint CLECs and other carriers and argues that this caused it harm. ⁵
8	Q.	IS IT RELEVANT THAT QWEST DID NOT KNOW ABOUT THE OFF-TARIFF
9		AGREEMENTS BETWEEN CLECS AND OTHER CARRIERS?
10	A.	No. Qwest did not need to take its cues from AT&T or Sprint; Qwest was at any moment
11		free to negotiate off-tariff agreements for switched access services.
12	Q.	IS IT EVEN CREDIBLE FOR QWEST TO CLAIM THAT IT DID NOT KNOW
13		THERE COULD BE OFF-TARIFF AGREEMENTS BETWEEN CLECS AND
14		IXCS?
15	A.	No. As discussed earlier, the FCC in its 2001 Order had explicitly discussed such
16		agreements. Further, as discussed, this Commission's rules explicitly provide for such
17		agreements. Last, there has been ample other indicators, such as agreements that

Weisman Direct at 12.

- surfaced elsewhere in the country, to indicate that the existence of such agreements are
- 2 hardly unexpected.⁶
- 3 III. QWEST'S CLAIM OF PRICE DISCRIMINATION IS PREDICATED ON A
- 4 FALSE ASSUMPTION THAT THE JOINT CLECS HAVE BOTTLENECK
- 5 CONTROL OVER ACCESS FACILITIES
- 6 c) Overview
- 7 Q. DOES QWEST CLAIM THAT THE JOINT CLEC PRICE DISCRIMINATED
- 8 AND HARMED QWEST?
- 9 A. Yes. Qwest witnesses claim that the Joint CLECs harmed Qwest by price discriminating
- 10 for switched access services.⁷

See for example a 2004 proceeding in Minnesota: In the Matter of the Complaint of the Minnesota Department of Commerce for Commission Action Against AT&T Regarding Negotiated Contracts for Switched Access Services, Docket Nos. P-442, 5798, 5826, 5025, 5643,443,5323,5668,466I/C-04) The Minnesota Department filed the Complaint on June 16, 2004. The public version of the Complaint discloses Eschelon's agreements with both AT&T and Sprint. The access charge case was on the Department's July 22, 2004, agenda (relating to consideration of a proposed protective agreement). Moreover, Joan Peterson, a Qwest attorney, is shown as receiving service of the meeting agenda: Joan Peterson's address is indicated as "Qwest Corporation." On August 24, 2005, Eric Swanson filed comments in the access charge case on behalf of "Owest", addressing the issue of differential pricing and of-tariff agreements. Owest filed its Colorado complaint as late as June 24, 2008, about four years later. Further, in December of 2005 the Minnesota Department filed a complaint against Granite (and Time Warner telecom and others) alleging that they had agreements with ATT. In its publicly-filed Answer dated February 20, 2006, Granite admitted that it had an agreement with AT&T, and that under that agreement "AT&T received lower switched access rates than Granite's tariffed rates." (See Granite Communications, LLC's Answer to the Minnesota Department of Commerce's Verified Complaint - Docket No. 99/C-05-1282.) Two Qwest representatives (Joan Peterson and Jason Topp) appear on the Minnesota service list. Thus, again, Qwest had at the very least knowledge that Granite (and others) had agreements with ATT two and a half years before the Colorado action was filed.

See, for example, Hensley Eckert Direct at 2, 3.

1	Q.	DO QWEST'S CLAIMS OF PRICE DISCRIMINATION AND DAMAGES
2		HINGE CRITICALLY ON THE ASSERTION THAT THE JOINT CLECS HAVE
3		BOTTLENECK CONTROL OVER ACCESS FACILITIES?
4	A.	Yes. To bolster Qwest's claims of economic harm, both professor Weisman ⁸ and Ms.
5		Hensley Eckert ⁹ assert that CLEC have bottleneck control over switched access facilities.
6		It is important to note that Qwest's testimony that CLEC switched access services and
7		facilities are monopoly services and bottleneck facilities is essential to its claim of
8		harmful price discrimination. In fact, without a demonstration that CLECs have
9		bottleneck control over access facilities, no claim of harmful price discrimination can be
10		made. 10 The following description of price discrimination makes the point:
11 12 13 14 15		Price discrimination exists when sales of identical goods or services are transacted at different prices from the same provider. In a theoretical market with perfect information, no transaction costs or prohibition on secondary exchange (or re-selling) to prevent arbitrage, price discrimination can only be a feature of monopoly and oligopoly markets, where market power can be exercised. [Emphasis added.]
17		That charging different prices to different customers is not harmful in any meaningful
18		economic sense unless it concerns monopoly services and bottleneck facilities that limit
19		consumer choice is obvious: if customers can avail themselves of viable alternatives, a

Weisman Direct at 6.

⁹ Hensley Eckert Direct at 9.

See, for example, Charles F. Phillips, *The Regulation of Public Utilities* (Public Utilities Reports, Arlington, Virginia, 3rd Edition, 1993), page 439.

http://en.wikipedia.org/wiki/Price_discrimination. For a more formal and complete discussion of price discrimination, see Jean Tirole, *The Theory of Industrial Organization*, The MIT Press, Cambridge, Massachusetts, Third Edition, 1989, Chapter 3, Price Discrimination.

1 practice of charging different prices to different customers has no or at worst only 2 unspecified and ambiguous welfare impacts and surely cannot be deemed, as Qwest does, harmful to competition, or, in this case, Owest, 12 Other required aspects of harmful price 3 discrimination, such as the intent to disadvantage certain competitors, will be discussed in 4 5 a separate section below. 6 Professor Weisman himself acknowledges that economically harmful price 7 discrimination requires that the service at issue concerns a monopoly service and/or a 8 bottleneck facility: 9 This potential for efficiency distortions explains why sound regulatory 10 principles require that bottleneck inputs, switched access, for example, be 11 priced uniformly to all similarly-situated purchasers of these inputs. That 12 is to say, the default pricing of switched access requires that a uniform 13 price be levied on each provider absent a factual and credible basis for departing from this uniform pricing standard. (Emphasis added.) 14 15 In what follows, I will demonstrate that the Joint CLECs do not control bottleneck 16 facilities. Next I will demonstrate that Qwest's witnesses rely on findings in a 2001 FCC 17 Order that were not meant to be permanent and have since been overtaken by events and 18 developments in the telecommunications industry.

Jean Tirole, *The Theory of Industrial Organization*, The MIT Press, Cambridge, Massachusetts, Third Edition, 1989, Chapter 3, Price Discrimination.

Weisman Direct at 9.

d) CLECs Do Not Control Bottleneck Facilities

1

Q.	WHAT IS A BOTTLENECK SERVICE OR FACILITY?
A.	The term bottleneck facilities generally refers to a situation in which a firm has control
	over certain facilities at the exclusion of other firms who require such facilities in order to
	compete. The term may be defined as follows:
	Essential facilities, or bottleneck facilities, are network elements or services that are provided exclusively or predominantly by a monopolist or a small number of suppliers and that cannot easily be replicated or substituted by competitors for economic or technical reasons. These types of facilities are critical inputs to retail service. ¹⁴
	MCI Communications Corp. v. AT&T is a seminal case dealing with essential facilities in
	the telecommunications industry. 15 In this case, the Seventh Circuit discussed the
	elements necessary to establish liability under the "essential facilities doctrine." They
	are:
	 (1) control of the essential facility by a monopolist, (2) a competitor's inability practically or reasonably to duplicate the essential facility, (3) the denial of the use of the facility to a competitor, and (4) the feasibility of providing the facility.
	_

See, for example, the definition of bottleneck facilities provided by ICT Regulation Toolkit at http://www.ictregulationtoolkit.org/en/Section.3443.html

MCI v. AT&T, 708 F.2d 1081, 1132 (7th Cir.) cert. denied, 464 U.S. 891 (1983).

See, for example, Federal Telecommunications Law by Peter W. Huber, Michael K. Kellogg, John Thorne, Page 327. Available on line: <a href="http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=PA1&dq=essential+facilities+doctrine-http://books.google.com/books?id=hkAS5wAfsc8C&pg=PA1&lpg=

1 2 While I am not addressing the legal question of whether liability can be established in this proceeding, I will be discussing that the Joint CLECs do not control bottleneck 3 4 facilities, which is a necessary condition for Owest's claims that the Joint CLECs have 5 engaged in economically harmful price discrimination. 6 Q. DO THE JOINT CLECS CONTROL BOTTLENECK FACILITIES, AS 7 ASSERTED BY THE OWEST WITNESSES? 8 A. No. The Joint CLECs in Colorado use access facilities that are generally available to 9 most carriers, including Qwest. In fact, many of the Joint CLECs' facilities used in the 10 provision of access services are facilities the Joint CLECs do not even own themselves 11 but rather have leased from Qwest. That is, many of the facilities over which the Joint 12 CLECs allegedly have bottleneck control are in fact owned and operated by Owest, the 13 parent company of QCC. Of course, because the facilities are owned and operated by 14 Qwest, QCC, and other qualified carriers, have access to these very same facilities. 15 Q. DOES QWEST HAVE A NEAR UBIQUITOUS NETWORK IN ITS SERVING 16 AREA, CAPABLE OF REACHING ALL END USER CUSTOMERS, ITS OWN 17 AND THE CLECS'? 18 Yes. Due to its legacy position as a RBOC and as part of its ongoing operations, Owest A. 19 owns and operates in its own serving area a near ubiquitous network with facilities that 20 allow it to serve virtually all end users. Even with respect to CLEC customers, served by

CLECs with loops leased from Qwest, Qwest tends to have duplicative facilities. It is

21

1		hard to see how one can credibly claim that the Joint CLECs - who lease much of their
2		facilities from Qwest – control bottleneck facilities.
2	0	
3	Q.	ARE CLECS ALLOWED TO LEASE ACCESS FACILITIES, SUCH AS LOOPS AND TRANSPORT FROM OWEST ON A LONG TERM AND EXCLUSIVE
4 5		AND TRANSPORT, FROM QWEST ON A LONG TERM AND EXCLUSIVE BASIS SO AS TO ESTABLISH BOTTLENECK CONTROL?
	٨	
6	A.	No. CLECs lease unbundled network elements ("UNE") such as loops on a month-by-
7		month basis conditional on who serves the end user customer. 17 CLECs simply do not
8		have bottleneck control over such facilities. Further, Qwest often operates duplicative
9		facilities (this is certainly true for most transport links) that would allow Qwest or others
10		an alternative path to end users.
11	Q.	ARE CLEC FACILITIES IN FACT OFTEN USED FOR HIGH VOLUME
12		BUSINESS CUSTOMERS THAT MAKE USE OF THESE FACILITIES BY
13		OTHER CARRIERS OR THE SUPPLY OF ALTERNATIVE FACILITIES
14		ECONOMICALLY VIABLE?
15	A.	Yes. Often the CLEC customers are business customers in urban areas and thus more
16		likely to have traffic volumes that are sufficiently high to justify competition for those
17		customers (and thus the facilities will be available to and come to be used by a successful
18		competitor) or the use of alternative paths. In any event, CLECs do not have bottleneck
19		control to prevent use of the facilities by competitors.

Some carriers obtain such network elements through commercial agreements.

i	Ų.	IN VIEW OF THE ABOVE, ARE THE FOUR ELEMENTS OF THE ESSENTIAL
2		FACILITIES DOCTRINE SATISFIED?
3	A.	No. Again, the four elements of the essential facilities doctrine are:
4 5 6 7 8		 (1) control of the essential facility by a monopolist, (2) a competitor's inability practically or reasonably to duplicate the essential facility, (3) the denial of the use of the facility to a competitor, and (4) the feasibility of providing the facility.
9		Clearly, the Joint CLECs are not monopolists, the Joint CLECs' competitors have access
10		to the same facilities as the Joint CLECs and often Qwest has duplicate facilities in place,
11		the Joint CLECs are in no way denying any carriers access, and it is feasible for other
12		carriers to provide the facilities. In sum, the Joint CLECs do not have bottleneck control
13		over essential facilities.
14 15 16		e) Qwest's Claim that the Joint CLECs Control Bottleneck Facilities Is Based on a 2001 FCC Finding that Was Explicitly Transitional and Is Now Outdated and Overtaken by Other FCC Orders
17	Q.	WHAT IS THE BASIS FOR QWEST'S CLAIM THAT THE JOINT CLECS
18		CONTROL BOTTLENECK FACILITIES?
19	A.	Qwest's witnesses bypass a more in-depth analysis of whether the Joint CLECs control
20		bottleneck; instead, they refer to an old FCC order. ¹⁸ Specifically, Qwest's witnesses
21		refer to the FCC's 2001 Order.

Weisman Direct at 6. Hensley Eckert Direct at 9.

1	Q.	DO THE FINDINGS IN THE FCC'S 2001 ORDER STILL SUPPORT THE
2		CLAIM THAT THE JOINT CLECS CONTROL BOTTLENECK FACILITIES?
3	A.	No. The findings in the FCC's 2001 Order were explicitly transitional and have since
4		been overtaken by events in the telecommunications industry.
5	Q.	PLEASE ELABORATE ON YOUR OBSERVATION THAT THE FCC'S
6		BENCHMARKING POLICY WAS EXPLICITLY INTENDED TO BE
7		TRANSITIONAL.
8	A.	The FCC explicitly noted that its findings were transitional: the FCC said:
9 10 11		We stress, however, that the [benchmark] mechanism set out below is a <i>transitional</i> one; it is not designed as a permanent solution to the issues surrounding CLEC access charges. ¹⁹
12		Though the FCC is currently engaged in efforts to comprehensively address inter-carrier
13		compensation issues, the FCC has yet to take action more than seven years later. As
14		explained below, market developments that have taken place since the FCC 2001 Order,
15		rendering its transitional findings obsolete.
16	Q.	YOU STATED ABOVE THAT CHANGES IN THE TELECOMMUNICATIONS
17		INDUSTRY HAVE OVERTAKEN THE FCC'S RATIONALE IN ITS 2001
18		ORDER. PLEASE EXPLAIN.
19	A.	In its 1997 Access Reform Order, the FCC specifically recognized the presumptively
20		competitive nature of CLEC exchange access services:

¹⁹ FCC's 2001 Order, ¶ 7. (Emphasis added.)

1 2 3 4	[A]s CLECs attempted to expand their market presence, the rates of incumbent LECs or other potential competitors should constrain the CLECs' terminating access rates. The Commission found that access customers likely would take competitive steps to avoid paying
5 6	unreasonable terminating access charges. Thus, it explained that a call recipient might switch to another local carrier in response to incentives
7	offered by an IXC. ²⁰
8	When the FCC revisited the issue in its 2001 Order, it came to an opposite conclusion.
9	The FCC noted:
10	We decline to conclude, in this order, that CLEC access rates, across the
11	board, are unreasonable. Nevertheless, there is ample evidence that the
12	combination of the market's failure to constrain CLEC access rates, our
13	geographic rate averaging rules for IXCs, the absence of effective limits
14	on CLEC rates and the tariff system create an arbitrage opportunity for
15	CLECs to charge unreasonable access rates. Thus, we conclude that some
16 17	action is necessary to prevent CLECs from exploiting the market power in the rates that they tariff for switched access services. ²¹
18	However, while the FCC concluded in 2001 that CLECs may have been able to exploit
19	some degree of market power, it is important to note that the FCC identified two
20	developments that would make exchange access markets competitive:
21	The Commission previously projected that, at least in the case of
22	originating access service, IXCs would likely enter marketing alliances
23	with LECs offering low-priced access service and would thereby be able
24	to exert downward pressure on CLEC access rates. The Commission even
25	raised the prospect that IXCs would themselves choose to enter the local

FCC's 2001 Order, ¶ 14, referencing In the Matter of Access Charge Reform; Price Cap Performance Review for Local Exchange Carriers; Transport Rate Structure and Pricing End User Common Line Charges; First Report and Order, CC Docket No. 96-262; CC Docket No. 94-1; CC Docket No. 91-213; CC Docket No. 95-72; FCC 97-158, 12 FCC Rcd 15982; 1997 FCC LEXIS 2591, May 16, 1997 ("1997 Access Charge Reform Order").

FCC's 2001 Order, ¶ 34.

1 2		service market as a means of exerting downward pressure on terminating rates. 22
3		That is, CLEC exchange access services would be subject to competitive alternatives if
4		the following occurred:
5 6 7		 Alliances between IXCs and ILECs. IXC entry into local exchange markets.
8		In 2001, the FCC lamented that neither of these developments had yet come to pass and,
9		accordingly, the FCC concluded that CLECs must have some degree of market power in
10		the provision of exchange access services:
11 12 13 14		However, neither of these eventualities has come to pass, at least not to an extent that has resulted in effective downward competitive pressure on CLEC access rates. We now acknowledge that the market for access services does not appear to be structured in a manner that allows competition to discipline rates. ²³
16		Of course, what the FCC was hoping for in 2001 – alliances between IXCs and ILECs
17		and IXC entry into local markets - now has come to pass.
18 19	Q.	HOW HAVE THESE PRECONDITIONS FOR A FUNCTIONING ACCESS MARKET SINCE COME TO PASS?
20	A.	All Regional Bell Operating Companies – including Qwest – have obtained Section 271
21		approval to provide interLATA long distance services, and perhaps more importantly,

²² FCC's 2001 Order, ¶32.

FCC's 2001 Order, ¶32. (Emphasis added.)

there have been a number of mergers between IXCs and ILECs – most notably the *megamergers* between AT&T and SBC and Verizon and MCI – which have further transformed the traditional ILECs into vertically integrated firms that offer local and long distance services. The watershed changes brought about by the megamergers and Section 271 approvals impact and alter any conclusions regarding the CLECs' ability – or lack of ability – to exercise market power due to any alleged barriers to entry faced by IXCs. Indeed, given that the RBOCs, such as Qwest, own and operate most of the country's local loop facilities (i.e., the links that connect to end user customers and over which switched access service is provided), it must now be concluded that their IXC affiliates no longer face any *barriers to entry*.

11 Q. ARE YOU SAYING THAT CLECS DO NOT HAVE MONOPOLY CONTROL

12 **OVER ACCESS FACILITIES?**

1

2

3

4

5

6

7

8

9

10

16

13 A. Yes. The above developments, among other the mergers between IXCs and LECs, have
14 provided the IXCs with competitive alternatives to the CLECs' facilities (which were
15 often leased in the first place.)

Q. PLEASE EXPLAIN FURTHER?

A. As indicated in the FCC's *Access Charge Reform Order*, the FCC envisioned a situation in which CLEC access rates would be constrained by an IXC providing incentives to call recipients (i.e., end user customers) to switch to another local carrier so that the IXC could avoid any excessive access rates of CLECs. Now that RBOCs like Qwest are large

1 vertically-integrated firms, their IXC companies, such as QCC, have the ability to do just 2 that; provide incentives to call recipients (i.e., end user customers) to switch to another 3 local carrier (most likely their affiliated local company) so that the IXC can avoid paying CLEC access rates that they deem excessive. 4 5 In short, the rationale that the FCC relied upon in 2001 for its "about face" – reversing a 6 prior conclusion that CLEC access rates are subject to competition –is simply no longer 7 valid. 8 Q. WHAT IS THE IMPORTANCE OF THE OBSERVATION THAT THE FCC'S 9 CONDITIONS FOR FUNCTIONING ACCESS MARKETS HAVE COME TO 10 PASS? 11 A. The market developments that have taken place since 2001 have transformed the environment and eliminated the barriers to entry faced by IXCs that led the FCC to 12 13 implement its benchmark policy. Given that the large integrated firms can easily avoid 14 access charges through the joint marketing of services with their affiliate LECs, the 15 presumption expressly contemplated by the FCC -- that the new market environment 16 created by these mergers will prevent CLECs from being able to exercise the necessary market power to sustain unreasonable access rates at the expense of IXCs -- has occurred. 17 18 IXCs now have options. 19 As explained above, through their local exchange company affiliates, IXCs have 20 alternatives and one cannot say that CLECs control bottleneck facilities.

1	Ų.	ARE THERE SUBSEQUENT FCC ORDERS IN WHICH THE FCC IN FACT
2		FINDS THAT CERTAIN ACCESS FACILITIES ARE NO LONGER
3		BOTTLENECK FACILITIES?
4	A.	Yes. The FCC in its <i>Triennial Review Order</i> ²⁴ and again in its <i>Triennial Review Remand</i>
5		Order ²⁵ determined that local communications markets do not exhibit impairment as it
6		relates to switching-related facilities and services - which are the very facilities and
7		services that support exchange access. For example, in the TRRO the FCC found:
8		We conclude, based on the record here, and the reasonable inferences we
9		draw from it, that competitive LECs not only have deployed a significant,
10		growing number of their own switches, often using new, more efficient
11		technologies such as packet switches, but also that they are able to use
11 12 13		those switches to serve the mass market in many areas, and that similar
		deployment is possible in other geographic markets. Additionally, we find
14		that the BOCs have made significant improvements in their hot cut
15		processes that should better situate them to perform larger volumes of hot
16 17		cuts ("batch hot cuts") to the extent necessary. We find that these factors substantially mitigate the <i>Triennial Review Order</i> 's stated concerns about
18		circuit switching impairment. ²⁶
19		The conclusions reached by the FCC in its TRO and TRRO (which removed the
20		unbundling requirements for ILEC switching) signify that switching-related facilities and

In the Matter of Review of the Section 251 Unbundling Obligations of Incumbent Local Exchange Carriers, Implementation of the Local Competition Provisions of the Telecommunications Act of 1996, Deployment of Wireline Services Offering Advanced Telecommunications Capability, CC Docket No. 01-338/96-98/98-147, Report and Order and Order on Remand and Further Notice of Proposed Rulemaking, FCC 03-36, Rel. August 21, 2003 ("Triennial Review Order" or "TRO").

In the Matter of Unbundled Access to Network Elements, Review of the Section 251 Unbundling Obligations of Incumbent Local Exchange Carriers, WC Docket No. 04-313, CC Docket No. 01-338, FCC 04-290, rel. February 4, 2005 ("Triennial Review Remand Order" or "TRRO").

²⁶ TRRO, ¶ 199.

services are not a source of significant market power. 27 Switching is of course only one 1 2 component of switched access services; still the FCC's finding that switching is not a 3 bottleneck facility undermines Owest's claim that CLECs have bottleneck control. 4 Further, as discussed previously, CLECs for the most part do not own their own loops but 5 tend to lease them as unbundled network elements, often from Qwest, on a conditional basis, ²⁸ so one cannot reasonably argue that CLECs have bottleneck control over loop 6 facilities. 7 8 The bottom line is that the current telecommunications marketplace is structured in such 9 a way that a CLEC do not have control over bottleneck facilities.

10 Q. DOES THE OBSERVATION THAT AN IXC HAS NO ALTERNATIVES AT THE MOMENT A CALL NEEDS TO ORIGINATE FROM OR TERMINATE TO A 11 12 CLEC CUSTOMER MEAN THAT CLECS HAVE BOTTLENECK CONTROL? 13 A. No. This is an erroneous and extreme short run analysis in which the IXC is portrayed as 14 having no alternatives at the very moment of call origination or delivery. Such a short 15 run analysis is meaningless. In the extreme short run, consumers lack alternatives to 16 most products they consume. For example, while in flight, I have no alternatives to an

My reference to the TRRO is no indication that I agree with the FCC's findings in the TRRO from an economic perspective. I only use it to illustrate the fact that the benchmark imposed by the FCC on CLEC interstate access rates in 2001 is inconsistent with the FCC's findings that carriers can reasonably provide services over self-provided switching (a fundamental component of switched access services) such that competing carriers are not impaired in the absence of unbundled access to the switching network element pursuant to Section 251 of the Act.

Loops are leased conditional on being able to serve an end user, and cannot be leased to exclude another carrier from using the loop to serve a specific customer.

airline's beverage and food services, bathroom services, headsets, etc. So what? An attempt to exploit a falsely perceived sense of bottleneck control by means of, say extortionist pricing, would quickly be penalized in the longer run. Once I hit ground, I would never use the airline again. The point is that any meaningful analysis of market structure, market power and control over bottleneck facilities needs to consider the long run and not the extreme short run. For example, under established antitrust analysis, prices above competitive levels signify market power only when they are sustainable over a significant time period, for the foreseeable future. See for example the United States Department of Justice's Horizontal Merger Guidelines, which is an authoritative source for market power discussions. Per the Horizontal Merger Guidelines, the DOJ typically considers longer time periods, such as a period of two years, to let market forces, including all existing and potential supplies and demand responses, play themselves out. Again, an analysis that basis a conclusion on the lack of alternatives at the very moment of call origination or call termination is utterly meaningless, since it, by construction, precludes the very market responses that would be capable of defeating an attempt at exercising market power/bottleneck control over facilities.

1 2		f) The Joint CLECS' Have No Incentive To Disadvantage Qwest Nor Have They Sought Gains at the Expense of Qwest
3	Q.	DID THE JOINT CLECS INTEND TO ADVANTAGE THEMSELVES AT THE
4		EXPENSE OF QWEST?
5	A.	No. Typically, one thinks of price discrimination as a situation in which a firm charges a
6		certain set of customers or one customer higher prices in order to either increase its
7		profits or to otherwise advance its competitive position vis-a-vis those customers in
8		downstream markets. None of those considerations are relevant in the current
9		proceeding. The Joint CLECs charged Qwest tariffed rates that are Commission
10		approved. Further, to the extent that the Joint CLECs engaged in off-tariff agreements
11		that might contain lower rates, those lower rates neither increase the Joint CLECs' rates
12		nor do they in advance the Joint CLECs' competitive position relative to Qwest in
13		downstream markets.
14	Q.	IS CHARGING DIFFERENT PRICES TO DIFFERENT CUSTOMERS FOR
15		GOOD FAITH REASONS SOCIALLY UNDESIRABLE OR OTHERWISE
16		OBJECTIONABLE?
17	A.	No. Virtually all companies vary prices for a large number of reasons, such as volume
18		discounts, off-peak pricing and cost considerations, sales and promotions to certain
19		qualifying customers, etc. There are indeed few instances in which price variations
20		across customers constitute harmful price discrimination and most of the time it concerns

socially desirable pricing practices that advance economic welfare. Consider for example

the following discussion on this issue:

21

22

1 Price discrimination is the practice of charging different persons different prices for the same goods or services. Price discrimination is made illegal 2 under the Sherman Antitrust Act. 15 U.S.C. §2, the Clayton Act, 15 3 U.S.C. §13, and by the Robinson-Patman Act, 15 U.S.C. §§13-13b, 21a, 4 5 when engaged in for the purpose of lessening competition, such as tying the lower prices to the purchase of other goods or services.²⁹ 6 7 If different prices are charged to different customers for a good faith 8 reason, such as an effort by the seller to meet the competitor's price or a 9 change in market conditions, it is not illegal price discrimination. Merely 10 charging different prices to different customers is not illegal, when there is no intent to harm competitors.³⁰ 11 12 Q. DO THE JOINT CLECS HAVE REASONS TO FAVOR OTHER IXCS, SUCH AS 13 AT&T, OVER QWEST IN ORDER TO ADVANCE THEIR OWN 14 COMPETITIVE POSITION OR PROFITS? 15 A. No. The Joint CLECs have no reason for ulterior motives in this regard. But for the economic reasons discussed in this testimony, the Joint CLECs have no incentive to 16 17 prefer, say, AT&T to Qwest in the sale of access services. Importantly, the Joint CLECs surely had no interest to favor AT&T over Qwest in order to advance their own 18 19 competitive position or profits. 20 In fact, as a result of the agreements, the Joint CLECs received rates lower than tariff 21 rates from AT&T (and other IXCs in some instances), which caused the Joint CLECs to 22 suffer harm and receive less access revenues. Again, the Joint CLECs did not enter into

See, for example, US Legal definitions at: http://definitions.uslegal.com/p/price-discrimination/
US Legal definitions at: http://definitions.uslegal.com/p/price-discrimination/

l		these agreements because they wanted to but because they were forced into it under
2		pressure from large buyers of their services. ³¹
3 4		g) Qwest Claims of Price Discrimination Are Unsupported by Cost Information: Qwest Is Not Similarly Situated as AT&T or Sprint
5	Q.	IS IT WELL RECOGNIZED THAT THE CLAIM OF PRICE DISCRIMINATION
6		HINGES CRITICALLY ON WHETHER THERE ARE VARIATIONS IN THE
7		COSTS BETWEEN CUSTOMERS?
8	A.	Yes. Price variations are entirely justified if there are variations in costs across
9		customers. In fact, if there are cost variations across customers and a carrier is forced to
10		offer its services at a uniform price, the uniform price is itself a form of price
11		discrimination. ³²
12	Q.	HAS QWEST PRESENTED DETAILED COST INFORMATION SO THAT THE
13		COMMISSION CAN EVALUATE QWEST'S CLAIM THAT THE JOINT CLECS
14		ARE PRICE DISCRIMINATING?
15	A.	No. While professor Weisman acknowledges the importance of cost information in
16		asserting that the Joint CLECs' off-tariff agreements are price discriminating, 33 he and
17		the other Qwest witnesses fail to present any cost information.

Further, it made sense for certain CLECs to engage in off-tariff agreements with AT&T in order to avoid protracted and costly collection and possibly ligations efforts.

See, for example, Charles F. Phillips, *The Regulation of Public Utilities* (Public Utilities Reports, Arlington, Virginia, 3rd Edition, 1993), page 69.

Weisman Direct at 5.

1 Q. IS QWEST SIMILARLY SITUATED AS AT&T?

A. No. AT&T is much larger than Qwest in terms of total CLEC-wide access charge
volume (specific to each carrier's agreement, i.e., nationwide, region wide, etc.). While
Qwest argues this volume provides no "cost basis" for reasonable discrimination – this
consideration is not Qwest's to make. Further, the notion that customers with larger
volumes qualify for different terms and conditions is hardly controversial and consistent
with what is observed elsewhere in the industry and practiced by Qwest itself.

8 Q. DO YOU HAVE SOME DATA THAT DEMONSTRATE THAT QWEST IS NOT

9 SIMILARLY SITUATED AS AT&T AND SPRINT?

10 A. Yes. AT&T and Sprint, though to a lesser degree, are much larger than Qwest in terms
11 of total CLEC-wide access charge volume (specific to each carrier's agreement, i.e.,
12 nationwide, region wide, etc.), especially if the time frame of when the Joint CLECs
13 entered into agreements with AT&T is considered (2000-2004). The following table
14 illustrates this point:

Mr. Brotherson's direct testimony lists the dates of the CLEC agreements with AT&T as follows: 2000 for Eschelon (p. 20), 2001 for XO (p. 7), 2003 for Granite (p. 17) and 2004 for ACN (p. 25). Using these dates in no way indicates that the Joint CLECs concede that they have any liability for activities during this time frame or at any date prior to the applicable statute of limitations period.

Table. Total Toll Service Revenues by Provider (in Millions)

Company	2000	2001	2002	2003	2004
AT&T Companies	\$ 38,110	\$ 33,942	\$ 27,531	\$ 22,814	\$ 23,619
Qwest Companies	\$ 3,418	\$ 3,444	\$ 3,377	\$ 2,948	\$ 4,090
Sprint Long Distance	\$ 9,038	\$ 8,424	\$ 7,077	\$ 6,326	\$ 5,900
Ratio: AT&T to Qwest	11.1	9.9	8.2	7.7	5.8
Ratio: Sprint to Qwest	2.6	2.4	2.1	2.1	1.4

Revenue Source: FCC, Statistics of Comunications Common Carriers (2004/2005 edition), Table 1.4

3 4

5

6

7

8

9

10

11

1 2

As seen in the above table, in terms of toll revenue, ³⁵ AT&T, for example, was 6 to 11 times larger than Qwest. These numbers are dramatic and invalidate Qwest's testimony alleging that rate differentials cannot be explained by differences in traffic volumes.

For residential markets – important for ACN – the FCC also reports the IXC market shares in terms of toll minutes. Based on that data, in 2002-2003 – the years immediately preceding ACN's agreement with AT&T,³⁶ AT&T's residential market share exceeded 30%, Sprint's market share was over 7%, while Qwest's market share was approximately 3%.³⁷

While the data on access or toll minutes are not publicly available, toll revenues is a reasonable proxy for the difference between Qwest's and AT&T access volumes, including access volumes with CLECs. Note that the FCC stopped reporting toll revenue data by carrier starting in 2005.

Because a CLEC agreement with an IXC is typically preceded by a period of IXC's non-payment and negotiations between the CLEC and IXC, the situation in the market in years immediately preceding the year of the agreement is the most relevant to the CLEC's decision to agree to reduced rates.

See the FCC *Trends in Telephone Service*, February 2007, Table 9.5.

1	Q.	PLEASE FURTHER EXPLAIN WHY TRAFFIC VOLUMES HAVE A BEARING
2		ON COSTS AND OFF-TARIFF RATE AGREEMENTS.
3	A.	Tariffed rates are by definition "averaged" rates, recovering "on average" costs that vary
4		across various circumstances. To better match rates with costs, the FCC and ostensibly
5		the Commission rules, permit CLECs to engage in off-tariff agreements with rates that
6		deviate from average rates. Access costs certainly do vary by volume, contrary to
7		Qwest's assertions.
8	Q.	GIVEN THAT QWEST IS NOT SIMILARLY SITUATED AS AT&T OR SPRINT
9		IS QWEST'S CLAIM THAT THE JOINT CLECS PRICING PRACTICES HAVE
10		DONE IT HARM JUSTIFIED?
11	A.	No. Because any rate differentials are justified by, among other reasons, volume and
12		commensurate cost differentials, any disadvantages Qwest may have experienced in its
13		competitive position vis-à-vis other carriers, such as AT&T, may simply be an
14		appropriate reflection of underlying volume and cost differentials and, as such, they do
15		not constitute damages.
16		Further, as discussed, given that Qwest is a price taker in retail markets, access rate
17		differentials are unlikely to have impacted Qwest's competitive position at all. ³⁸ In any
18		event, Qwest surely has made no demonstration how its competitive position was
19		impacted.

Again, under economic theory, Qwest simply meets the market price in order to be competitive with AT&T and others, irrespective of whether AT&T is allowed to pay the Joint CLECs' tariffed switched access rates or something lower.

1 Q. IS IT LOGICAL FOR CLECS TO EXTEND OFF-TARIFF AGREEMENTS TO

2 **AT&T?**

A.

3

4

5

6

7

8

9

10

11

12

13

18

Yes. As the nation's largest telecommunications firm, AT&T, as a monopsonist, has market power over its much smaller suppliers.³⁹ For example, CLECs are in no position to refuse service to AT&T while marketing its services to end users with the caveat sales pitch: "....oh, but by the way, if you use our service you won't be able to receive any calls from AT&T long distance customers – the largest long distance carrier in the nation." In part, AT&T's market power is enhanced because of its dominance in the national marketplace (whereas Qwest's strength is more regionalized). The nationwide scope of any agreements with AT&T highlights the differences between AT&T, Sprint and Owest.⁴⁰

Q. HAS QWEST ACTIVELY SOUGHT TO ESTABLISH OFF-TARIFF

AGREEMENTS WITH THE JOINT CLECS?

A. To my knowledge, prior to 2008, Qwest did not actively seek to establish off-tariff
agreements with the Joint CLECs in Colorado in the manner that AT&T and others did.
This further situates them differently than, say, AT&T, who worked actively (and
aggressively) in this regard. For example, if Qwest has an agreement with Hertz Rent-a-

Car, and Alamo continues to pay the tariffed rate, is Qwest discriminating against Alamo

Provide definition of the term monopsonist, plus references.

Further, it made sense for certain CLECs to engage in off-tariff agreements with AT&T in order to avoid protracted and costly collection and possibly ligations efforts.

because it did not actively seek Alamo out to tell them about the better deal it had given
 Hertz? The answer is certainly no.

Q. SHOULD CLECS BE REQUIRED TO PERFORM DETAILED COST STUDIES TO JUSTIFY THEIR PRICING PRACTICES?

A. No. CLECs are presumptively competitive carriers subject to a different form of regulation than ILECs and not required to conduct cost studies to support their rates. As such, CLECs generally have not submitted cost studies for their services.

8

9

10

11

12

13

14

15

As discussed, Qwest's claim of price discrimination requires a demonstration that the Joint CLECs' costs do in fact not vary with the different volumes of access traffic generated by AT&T, Sprint and Qwest. However, given that Qwest initiated this complaint proceeding, it should not be allowed to reverse the burden of proof and force the Joint CLECs to make cost demonstrations. Moreover, everybody that works in this industry and has examined cost information will be aware that traffic volumes are a major cost driver: as such, the conclusion that costs vary with traffic volumes should be the rebuttable presumption – and Owest failed to rebut it. 42

Qwest employs economist and cost analyst that are experienced in the review and preparation of cost studies for both Qwest and other companies.

For a discussion of how economies of scale impact costs, see, for example, In the Matter of Implementation of the Local Competition Provisions of the Telecommunications Act of 1996, CC Docket No. 96-98, Third Report and Order and Fourth Further Notice of Proposed Rulemaking, FCC 99-238, Rel. November 5, 1999, ¶ 258 ("UNE Remand Order"). While this discussion focuses on switching, it is also pertinent to the costs of other network components, such as transport.

1 2	IV.	QWEST HAS FAILED TO SHOW THAT IT HAS BEEN HARMED BY JOINT CLEC PRACTICES
3	Q.	WHAT IS THE <u>CONCEPTUAL NATURE</u> OF THE DAMAGES QWEST
4		CLAIMS?
5	A.	The fact that other carriers were charged lower rates than Qwest in and of itself does not
6		constitute harm or damages. Thus, in order to make a case for damages, Qwest witness
7		professor Weisman claims that Qwest has been harmed in its competitive position as an
8		IXC relative to its competitor IXCs. 43 Of course, saying that Qwest has been harmed in
9		its competitive position in no way quantifies how much the damages are.
10	Q.	HOW DOES QWEST <u>CALCULATE</u> WHAT ITS DAMAGES ARE?
11	A.	Qwest calculates its damages as the differential between the access rates it has been
12		charged and those that others have been charged. As Qwest's witness Ms. Hensley
13		Eckert puts it:
14 15 16 17		Retrospectively, QCC believes it is entitled to reparations (i.e., refunds) of amounts it overpaid the respondent CLECs relative to the discounted amounts it would have paid had the CLECs extended the same discount to QCC as they did to AT&T and Sprint. ⁴⁴
18		The actual calculations are performed and supported by Qwest witness Mr. Canfield.
19	Q.	ASIDE FROM THE QUESTION WHETHER THE JOINT CLECS ARE
20		PERMITTED TO OFFER LOWER, OFF-TARIFF RATES TO OTHER

Weisman Direct at 4, and Section IV.

Hensley Eckert Direct at 19, 20.

1		CARRIERS, IS QWEST'S <u>METHOD</u> OF CALCULATING DAMAGES
2		CORRECT?
3	A.	No. First, Qwest has not been, as alleged by Qwest, overcharged or harmed. Be that as it
4		may, the differential between what Qwest paid and what other carriers may have paid in
5		no way constitutes an economic "damage" that meaningfully corresponds to the alleged
6		impairment of its competitive position.
7	Q.	HAS QWEST DEMONSTRATED THAT THE RATE DIFFERENTIAL IS
8		CONCEPTUALLY AND QUANTITATIVELY EQUAL TO THE ALLEGED
9		IMPAIRMENT IN ITS COMPETITIVE POSITION?
10	A.	No. Professor Weisman, who testifies to economic issues and discusses that Qwest has
11		been impaired in its competitive position, does not discuss how Qwest's damages should
12		be calculated nor does he give guidance on this issue to the other Qwest witnesses.
13		Indeed, there is a complete disconnect between the economic testimony provided by
14		professor Weisman and Mr. Canfield's "damages" calculations. To be sure, professor
15		Weisman's testimony does not provide any economic or conceptual support for Mr.
16		Canfield's approach to and quantitative outcomes of his "damages" calculations. In any
17		event, it seems as if Mr. Canfield's testimony floats in a legal and economic vacuum,
18		unconnected to the testimony of professor Weisman.
19	Q.	WHY IS THIS PROBLEMATIC?
20	A.	It is problematic for a number of reasons. First, even if the Commission were to agree
21		with professor Weisman (and the Commission shouldn't), it in no way follows that

damages should be calculated as Mr. Canfield does. Again, there is a total disconnect 1 2 between professor Weisman's testimony and Mr. Canfield's alleged "damages" 3 calculations. 4 Next, Mr. Canfield is not an economist and does not otherwise attempt to demonstrate 5 that he is qualified to testify to how economic damages should be calculated, which, as 6 noted, is a highly complex legal and economic issue. The same is true for Ms. Hensley 7 Eckert. This means that irrespective of whether this Commission has the authority to 8 order the Joint CLECs to pay for damages, the Commission simply doesn't have a record 9 to adequately quantify such damages. 10 Q. HAS QWEST IN ANOTHER SETTING ARGUED AGAINST THE 11 APPLICATION OF THE TYPE OF "DAMAGES" CALCULATED BY MR. 12 **CANFIELD?** 13 A. Yes. Qwest argued before the Minnesota Department of Commerce ("DOC") that the 14 only legally permissible remedy was a monetary penalty payable to the Minnesota DOC 15 and that damages, such as the ones calculated by Mr. Canfield in the current proceeding, 16 were not available to other telephone companies, such as Qwest in the current 17 proceeding, who were not parties to the unfiled agreements. See Ex. W, Qwest Corp. 18 Proposed Procedure for Penalty Phase, Exceptions to ALJ Findings of Fact, Conclusions 19 of Law, and Recommendation (Sept. 30, 2002) at 115-116, Qwest Unfiled Agreement 20 Action.

Qwest appealed the Minnesota DOC's order to a federal district court in Minnesota. That court upheld the penalty against Qwest but reversed the award to non-contracting CLECs on statutory authority grounds. Qwest appealed to the Eighth Circuit, which affirmed both of the district court's rulings. Thus, both courts agreed with Qwest that the only permissible remedy for a carrier's unfiled agreements was the monetary penalty ordered by the commission against that carrier—not damages to any non-party telephone company. Yet, in the current proceeding Qwest is seeking damages at odds with Qwest's successful opposition to such damages.

Q. HAS QWEST ATTEMPTED TO QUANTIFY BY OTHER MEANS

IMPAIRMENT IN ITS COMPETITIVE POSITION?

11 A. No. Qwest has provided no meaningful quantification of how its competitive position
12 has been impaired. In fact, other than general discussions about price discrimination and
13 some hypothetical discussions about least cost providers, there is no testimony showing
14 that Qwest's competitive position has been impaired at all.

Q. IS IT LIKELY THAT ACCESS RATE DIFFERENTIALS HAVE NOT

IMPAIRED QWEST'S COMPETITIVE POSITION?

17 A. Yes. Qwest, AT&T and others compete as large vertically integrated firms for many services for millions of customers across many states. It is not plausible that the

relatively small amounts calculated by Mr. Canfield ***xxxxxxxxx*** would have a

meaningful – if any at all – impact on Owest's ability to price its services competitively.

Q. WHY DO YOU SAY THAT QWEST'S ABILITY TO PRICE ITS SERVICES COMPETITIVELY IS LIKELY NOT IMPACTED BY THE JOINT CLECS'

5 PRICING PRACTICES?

6

7

8

9

10

11

12

13

14

15

16

17

18

19

A.

Telecommunications end user markets are generally competitive and companies, even large ones such as AT&T, Verizon and Qwest are *price takers*. This means that Qwest sets its end user prices relative to what the market can bear – *not relative to what CLECs charge AT&T or Qwest for access*. Put differently, under economic theory, we must assume that Qwest simply meets the market price in order to be competitive with AT&T and others, irrespective of whether AT&T is allowed to pay the Joint CLECs' tariffed switched access rates or something lower. Thus, a slight and relative to Qwest's and AT&T's overall costs nearly imperceptible differential in access charges is likely to have no impact on Qwest's end user pricing and its competitive position relative to AT&T and others. (In a separate section below I will discuss that AT&T and Qwest have a settlement agreement that covers various off-tariff agreements the companies have engaged in across the country, and so the relationship between the two companies and how access rates impact their relative competitive positions is very different than portrayed by professor Weisman and Mr. Canfield.)

1	Q.	IN SUM, HAS QWEST SHOWN THAT IT HAS BEEN HARMED BY THE JOINT
2		CLEC'S PRACTICES?
3	A.	No. Further, as noted before, even if it is determined that the Joint CLECs failed to
4		abide by the Commission's rules, their primary infraction would be that they did not file
5		the agreements at issue. CLECs were free to enter into such agreements, they simply did
6		not file them. In view of this, Qwest has no basis for asserting that had it known about
7		the agreements it could have availed itself of lower rates. Clearly, the CLECs were under
8		no obligation to give Qwest the rates lower than the tariffed rates. (Moreover, as
9		discussed above, prior 2008, Qwest never actively sought off-tariff agreements in the
10		manner that AT&T and others did.) Thus, even if the Commission were to find CLEC
11		non-compliance with certain filing rules, such failure to file certain agreements still did
12		not cause Qwest damages, nor has Qwest shown that it incurred any.
13 14 15	V.	QWEST'S AGREEMENT AND SETTLEMENT WITH AT&T FURTHER UNDERMINES QWEST'S UNSUPPORTED CLAIMS THAT IT HAS BEEN HARMED
16	Q.	HAS QWEST ENTERED INTO A SETTLEMENT AGREEMENT WITH AT&T
17		THAT COVERS A LARGE NUMBER OF BILLING DISPUTES AND OFF-
18		TARIFF ACCESS AGREEMENTS?
19	A.	Yes. Qwest and AT&T have a settlement agreement ("Settlement Agreement and
20		Release") that covers a large number of billing disputes and off-tariff agreements across
21		many states, including Colorado, and resolves various countervailing claims the
22		companies have on one another. The agreement states as follows:

WHEREAS, in the AT&T Unfiled Agreements Cases, AT&T has alleged against QC, in summary and incorporating all pleadings filed in each of those cases by reference, that QC provided local, intrastate, and interstate telecommunications services, interconnection and facilities to other carriers at rates, terms or conditions through agreements that were not filed with the applicable state commissions for review and approval or that were not otherwise made available or provided to AT&T at such rates, terms or conditions pursuant to interconnection agreements between the parties or as otherwise allegedly required by state and federal statutory and common law; claims asserted by AT&T include, by way of example and without limitation, breach of contract, breach of covenant of good faith and fair dealing, violation of antidiscrimination and anti-preference laws, violation of state and federal filing obligations, violation of antidiscriminatory restrictions, violation of laws prohibiting unreasonable rates, violation of antitrust and competition laws, fraud, promissory estoppel, for punitive and treble damages, and other related claims[.] (Emphasis added.)

33

34

35

WHEREAS, in the CLEC Switched Access Agreements Case, OCC has alleged against AT&T, in summary and incorporating all pleadings filed in this case by reference, (1) that AT&T entered into agreements with various CLECs that granted AT&T certain rates, terms and conditions that are different from certain rates, terms and conditions in the CLECs' intrastate switched access tariffs that were effective in Minnesota and 34 other states, and (2) that AT&T's competitive local exchange carriers ("AT&T CLECs") entered into agreements with Verizon or MCI carrier entities that granted certain rates, terms and conditions that are different from certain rates, terms and conditions in the AT&T CLECs' tariffs. Claims asserted by Qwest against AT&T included violations of tariffs and related state law requirements, misrepresentation, omission, fraud, conspiracy to violate taritf requirements, aiding and abetting violations of tariffing requirements, and declaratory and injunctive relief (collectively, these claims are referred to as the "Owest CLEC Switched Access Agreements Claims")[.] (Emphasis added.)

O. WHAT IS THE SETTLEMENT PAYMENT AMOUNT?

- According to the Settlement Agreement, the end result of weighting all countervailing 1 A. claims between the parties apparently is that Owest has agreed to pay AT&T *** 2 3 XXXXXXXXXXX ***
- 4 Q. IS THE SETTLEMENT AGREEMENT BETWEEN AT&T AND QWEST RELEVANT TO THIS PROCEEDING? 5
- Yes. First, it demonstrates that the off-tariff agreements at issue in the current proceeding A. are common place and that both Qwest and AT&T engage in them. Most notably, Qwest's feigned surprise at finding that such agreements exist – and the claim that if they had know, Owest would have been harmed less⁴⁷ – seems to be less than forthright. Second, Qwest's claim – that its competitive position relative to AT&T has been impaired – becomes even more improbable. I have already discussed that Qwest, like others in most retail telecommunications markets, is a price taker and that its competitive position is likely entirely unaffected by the rate differential involved in access services obtained from the Joint CLECs. 48 Now we learn that Owest, like AT&T, routinely engages in such off-tariff agreements and that the two companies make "true-ups" to each other, to level the playing field. It is important to note that none of this is discussed 16 in the testimony of professor Weisman nor is it in anyway reflected in the damages

calculations of Mr. Canfield.

17

⁴⁷ Weisman Direct at 12.

Again, under economic theory, we must assume that Qwest simply meets the market price in order to be competitive with AT&T and others, irrespective of whether AT&T is allowed to pay the Joint CLECs' tariffed switched access rates or something lower.

1		Further, the Commission should note the magnitude of the settlement agreement – a
2		payment made by Qwest to AT&T ostensibly for infractions and harm done by Qwest to
3		AT&T – and the amount of the rate differential Qwest claims in the current proceeding:
4		*** xxxxxxxxxx xxxxxxxxxxxx xxxxxxxxx xxxxx
5		xxxxx xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx
6		relative competitive positions, as professor Weisman claims they do, it is AT&T that was
7		being competitively impaired relative to Qwest and not the other way around.
8	Q.	DOES THE SETTLEMENT AGREEMENT ADDRESS QWEST'S ABILITY TO
9		PURSUE ALLEGED DAMAGES OR INJURIES RELATED TO OTHER OFF-
10		TARIFF AGREEMENTS?
11	A.	Yes. For example, Paragraph 7 states as follows:
12 13 14 15 16 17 18 19 20 21 22 23		Consideration from AT&T to Qwest. None of the consideration from AT&T to Qwest in this Settlement Agreement pertains to or is attributable to any damages or injuries that Qwest may have suffered or will suffer as a result of the agreements, conduct, or omissions of CLECs (other than AT&T's CLECs) and such CLECs' direct or indirect provision of discounts off of tariffed switched access charges to AT&T or other interexchange carriers, and there are no third party beneficiaries to this Settlement Agreement. Any monetary consideration exchanged between the Parties pursuant to this Settlement Agreement addresses and relates to conduct or events that pre-date this Settlement Agreement and does not provide compensation for any service or facility provided by either Party that post-dates this Settlement Agreement.
24	Q.	DOES THIS MEAN THAT QWEST HAS NOT BEEN "COMPENSATED" FOR
25		ALLEGED HARM DUE TO THE ACTIONS OF THE JOINT CLECS IN THE

26

CURRENT PROCEEDING?

No. First, I have already demonstrated that the Joint CLECs' actions have not harmed 1 A. Owest. Be that as it may, given that only the parties involved in the negotiations between 2 AT&T and Owest know what countervailing considerations went into the settlement 3 payment made by Owest to AT&T, paragraph 7 illuminates nothing. The Agreement is 4 not testimony under oath, and the parties were free to add language of their liking, 5 6 irrespective of the truth content. For example, Qwest may simply have negotiated for this 7 language to be included – whether or not AT&T compensated Qwest for off-tariff 8 agreements.

9 Q. DOES THE SETTLEMENT AGREEMENT ALSO SHOW THE SELECTIVE 10 AND ARBITRARY NATURE OF QWEST'S COMPLAINT?

11

12

13

14

15

16

17

18

19

20

21

A.

Yes. It is important to note that the Agreement absolves AT&T's CLEC from any liability in this case despite the fact that apparently it too had such agreements with IXCs. In other words, QCC has an agreement with AT&T's CLEC about access charges that result in different treatment of AT&T's CLEC from the other CLECs concerning past untarriffed access charges in Colorado. Section 3 (B) of The Agreement states that nothing precludes Qwest from commencing proceedings "Against any CLEC, other than AT&T's CLECs, that seek any retroactive or prospective relief or remedy..." and "Qwest releases and will not pursue any such claims against AT&T, both as an IXC and as a CLEC." It also dictates that Qwest will not try to "void or have declared unenforceable any such agreements between AT&T and CLECs." In other words, Qwest agreed not to try to interfere with AT&T's "unlawful, discriminatory" contracts. Apparently, Qwest is

1	only concerned with some contracts but not others, thus undermining its claims that it has
2	been harmed in its competitive position relative to AT&T – after all, it signed an
3	agreement that seems to condone AT&T's practices.

4 Q. DO YOU HAVE AN ADDITIONAL OBSERVATION REGARDING THE 5 SETTLEMENT AGREEMENT BETWEEN AT&T AND QWEST?

6

7

8

9

10

11

12

13

14

15

16

A.

Yes. As I have discussed above, the Joint CLECs are no match against AT&T with its massive purchasing power, and if they offered AT&T lower off-tariff rates it is because they felt they had to, not because they wanted to. It is interesting to note that Qwest was sitting across the table from AT&T in negotiations over off-tariff agreements and had an opportunity to address its grievances with AT&T, the very party who instigated the off-tariff agreements at issue in this proceeding. While it is not clear whether or not Qwest did (as I discussed above), but if Qwest claims that it didn't, they too must have buckled under against AT&T's negotiating dominance. In any event, Qwest had a chance to settle its grievances with AT&T, and I do not think that the Commission should facilitate Owest's attempts to turn on the weakest players in all of this: the Joint CLECs.

VI. CRITIQUE OF CANFIELD DAMAGES CALCULATIONS

Q. YOU HAVE ALREADY DISCUSSED A NUMBER OF REASONS WHY
 QWEST'S CLAIMS ARE MISGUIDED. HOWEVER, EVEN IF THE
 COMMISSION WERE TO AGREE WITH QWEST THAT IT HAS BEEN
 HARMED AND THAT DAMAGES SHOULD BE CALCULATED BASED ON

1 MR. CANFIELD'S APPROACH, ARE MR. CANFIELD'S CALCULATIONS 2 **CORRECT AND RELIABLE?** No. Even if the Commission were to agree with all of Qwest's arguments, Mr. Canfield's 3 A. calculations are too deeply flawed to be relied on by the Commission. In what follows, I 4 5 will discuss the errors in Mr. Canfield's analysis in more detail. My discussion, however, 6 is not intended as an audit of Mr. Canfield's calculations. That is, the corrections I 7 discuss are not intended to capture all of Mr. Canfield's errors. Rather, my discussion 8 serves to demonstrate that Mr. Canfield's numbers are flawed and cannot be relied upon 9 by the Commission. 10 Q. MR. CANFIELD'S DIRECT TESTIMONY PRESENTS HIS ESTIMATES OF ALLEGED CLECS' "OVERCHARGES," WHICH HE SUMMARIZES ON PAGE 11 12 47. IGNORING FOR A MOMENT THE FACT THAT OWEST'S CLAIMS ARE UNJUSTIFIED IN PRINCIPLE, DO YOU AGREE WITH HOW MR. CANFIELD 13 14 **CALCULATES HIS NUMBERS?** 15 No. Mr. Canfield's approach is to calculate the difference between the actual intrastate A. switched access amounts billed to Qwest by CLECs and the amounts Qwest would have 16 been billed under the rates from the CLECs settlement agreements with other IXCs. 49 17 Though I do not agree with the relevance of this calculation, the review of Mr. Canfield's 18

Direct Testimony of Derek Canfield on behalf of Qwest Communications Company, LLC "Canfield Direct," p. 47.

analysis⁵⁰ shows that his estimates are grossly overstated even from the standpoint of his declared approach.

3 Q. PLEASE DESCRIBE BRIEFLY MR. CANFIELD'S APPROACH TO

4 ESTIMATING THE ALLEGED "OVERCHARGES."

5

6

7

8

9

10

11

- A. Mr. Canfield's general approach to the calculation of the alleged "overcharges" is (a) to take the difference between CLEC rates on bills to Qwest and the CLEC rates under the agreements with other IXCs; and (b) multiply that difference by Qwest's volumes (minutes of use on CLECs access bills to Qwest). To accomplish this task, Mr. Canfield relies on Qwest's internal records related to CLECs' invoices to Qwest for switched access services in Colorado. For rate information, Mr. Canfield also utilizes CLECs and Qwest state access tariffs, as well as the language in the CLECs' settlement agreements with other IXCs.
- 13 Q. PLEASE EXPLAIN IN MORE DETAIL WHY MR. CANFIELD'S NUMERICAL
 14 ESTIMATES ARE OVERSTATED.
- 15 A. Mr. Canfield's analysis contains a number of inaccuracies. The first group of
 16 inaccuracies stem from the fact that Qwest's internal records regarding CLECs' invoices
 17 are incomplete. Specifically, as explained in Mr. Canfield's testimony, Qwest's internal

Mr. Canfield's workbooks underlying his analysis and exhibits DAC1 through DAC13 were provided in Qwest's data responses to Joint CLECs 1st Set, Request No. 3 as confidential attachments A through O.

records include either "electronic" or "manual" invoices. 51 While the "electronic invoices" contain both rate and volume information, for the "manual" invoices Mr. Canfield has access to only the total (interstate and intrastate combined) amounts billed. ⁵² In other words, not only is Mr. Canfield lacking any rates, volumes or rate element detail from the "manual" invoices, he is also lacking the knowledge of the total intrastate amounts (the only jurisdiction of interest in this case). To fill in the gaps in the data, Mr. Canfield makes two generic assumptions: That the split between total interstate and total intrastate amounts on manual invoices is the same as on electronic invoices, and that the "variance" (the estimate of alleged "overcharges") on manual invoices is the same as on electronic invoices. Intuitively, these generalizations are problematic because there likely exists a "qualitative" difference between electronic and manual invoices. For example, for Eschelon, 53 Mr. Canfield utilizes *** xxxx*** manual invoices. While these invoices billed amounts during this time come from *** xxx *** invoices that fall in the first ***

12 Q. IS THE PROBLEM WITH MR. CANFIELD'S ANALYSIS OF "MANUAL" 13 INVOICES SPECIFIC TO ESCHELON'S DATA?

14 A. No. Mr. Canfield manipulates the "manual invoice" information for XO in the similar

15 fashion, ⁵⁸ approximating the alleged "overcharge" estimates for manual invoices from

16 the generic proportions observed in electronic billing data. For XO this approach is

17 particularly flawed because – as admitted in Mr. Canfield's testimony, *** "xxxxxxx

xxxxxxxx***** of alleged XO's "overcharges" on manual bills. I noticed two

9 Q. ARE THERE ANY OTHER INACCURACIES IN MR. CANFIELD'S 10 CALCULATIONS OF ALLEGED CLECS' "OVERCHARGES?"

11 A. Yes. A number of inaccuracies in Mr. Canfield's analysis relate to his interpretation of
12 the "agreement rates" – rates that CLECs received as a result of settlement agreements
13 with other IXCs. The most obvious example is Mr. Canfield's calculation of XO's
14 alleged "overcharges:" Notes in Mr. Canfield's workbook describe the XO's agreement
15 with the other IXCs as charging *** xxxxxxxxx *** for the 800 database service, and

1

2

3

4

5

6

7

⁵⁹ Canfield Direct, p. 14.

As noted above, Mr. Canfield calculates intrastate amounts for manual invoices by multiplying the total (interstate and intrastate) amounts on the manual bills by the percentage of intrastate amounts on electronic bills.

Qwest's data responses to Joint CLECs 1st Set, Request No. 3, confidential attachment C.

*** xxxxxxxxxxxxxxxxxxxxxxx *** for other switched access services. 63 Yet, Mr. Canfield fails to implement his own notes when performing the calculations: In place of the "agreement rates" he simply uses the ILEC's (Qwest) rates, which are different (and in some cases, higher) than the agreement rates. For example, *** xxxxx *** 800 database rate is lower than the ILEC's (Owest) switched access rate, and starting in July 2006, *** xxxxxxxxxxxxx *** became lower than ILEC's (Qwest) switched access rates, meaning that starting in July 2006 *** xxxxxxxxx xxxxxxxxxxxx xxxxxxxxxx xxxxxxxx ***. These oversights further overstate Qwest's estimate of alleged overcharges.

9

10

11

12

13

14

15

18

Q. ARE ERRORS IN MR. CANFIELD'S DERIVATION OF SETTLEMENT AGREEMENT RATES SPECIFIC TO XO'S DATA?

A. No, there are numerous inaccuracies in Mr. Canfield's calculations for other CLECs. At least four different types of inaccuracies relate to Mr. Canfield's calculations for Eschelon. First, Mr. Canfield inexplicably assumes that under the settlement agreements a portion of IXC's traffic would be billed on a monthly/per facility (rather than usage/per minute) basis. 64 This assumption is simply incorrect – Eschelon bills (and has been 16 17 billing) switched access charges only on usage/per minute basis. Mr. Canfield's assumption causes an over-statement of alleged overcharges.

Id., Tab "Billing," cells B23:B25. This interpretation is consistent with Mr. Brotherson's Confidential Exhibit LBB-4 (pp. 8-9), which contained the Settlement Agreement between XO and

Qwest's data responses to Joint CLECs 1st Set, Request No. 3, confidential attachment E, Tab "Billing."

Second, Mr. Canfield failed to include tandem switching charge when calculating Eschelon's settlement agreement rates: Eschelon's settlement agreement rates were generally tied to *** xxxxxxxx *** rates and set in the form of composite rates derived from various rate elements. When calculating Eschelon's composite settlement agreement rates, Mr. Canfield omitted the tandem switching rate of the amount of \$0.005/ per minute during the period of interest. 65 As a result, Mr. Canfield estimates of Eschelon's composite settlement agreement rates are significantly understated. 66 and the resulting alleged overcharges are overstated. Third, Mr. Canfield incorrectly assumes that the rate setting rules in Eschelon/AT&T agreement would apply to periods after the termination of that agreement: As explained in Ms. Copley's testimony, Eschelon's agreement with AT&T (the agreement that set rates at *** xxxxxxxxx ***) ended in March 6, 2005, and starting from that date and until the billing date of December 5, 2007, AT&T and Eschelon reached a number of billing dispute settlements. Mr. Canfield assumes that rates in these settlements would be calculated at the levels of the then-current *** xxxxxxxxxxxxxxx ***, while in reality the settlement rates did not follow this rule. For example, as shown in Ms. Copley's confidential exhibit EC3, for a number of periods AT&T and Eschelon settled

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

See Qwest's tariff included in public exhibit LBB-5 (p. 5) to Mr. Brotherson's testimony.

For example, Mr. Canfield calculates Eschelon's settlement agreement rate for originating traffic in the range of *** xxxxx *** per minute depending on the period, while the correct Eschelon's settlement agreement rate for originating traffic was approximately *** xxxxx *** per minute. The latter amount is listed in Confidential exhibit LBB-15, which contains correspondence between AT&T and Eschelon regarding settlements and settlement rates (see for example, p. 25).

on the numerical values of *** xxxxxxxxxxxxxx ***, which were higher than the 1 then-current *** xxxxxxxxxxxx ***. As a result, Mr. Canfield's assumption causes 2 3 further overstatement of alleged overcharges. Fourth, Ms. Copley explains that has been no settlements between Eschelon and AT&T 4 5 for bills after December 5, 2007 (meaning that Eschelon charged both Owest and AT&T 6 the same tariffed rates). Yet, Mr. Canfield incorrectly includes the period after December 7 5, 2007 bills in his calculations of the alleged overcharges, causing their additional 8 overstatement. 9 ARE THERE ANY OTHER EXAMPLES OF INACCURACIES IN MR. Q. 10 CANFIELD'S CALCULATIONS OF ALLEGED OVERCHARGES? Yes. Several examples are contained in Mr. Canfield's calculations for Granite. ⁶⁷ First, 11 A. 12 as a general matter, this workbook appears to be unfinished. For example, in contains blank entries in the area where the main calculations should be done, ⁶⁸ unmarked and 13

Owest that include zero entries or other values that do not match the tariff. 70

14

15

unexplained data entries "on the side", and the rates that Granite supposedly charged

Qwest's data responses to Joint CLECs 1st Set, Request No. 3, confidential attachment D.

Id., Tab "Billing," cells J2 and K2.

Id., Tab "Billing," cells P9:S20.

Id., Tab "Billing," cells G2 (zero rate), G3 and G4 (originating rates that do not match the tariff rates). The tariff rates are listed in exhibit LBB-15, p.1 to Mr. Brotherson's testimony.

Second, as captured in Mr. Brotherson's confidential exhibits LBB-11 and LBB-12, 2 Granite has a written agreement with AT&T and an informal agreement with Sprint. The AT&T agreement called for *** xxxxxxxx ***, while Sprint's agreement was to 3 charge a rate of *** xxxxxxxxxx ***. For the state of Colorado the rates in 4 AT&T agreement would be significantly higher than the rates in Sprint's agreement.⁷² 5 6 Mr. Canfield uses the rates from Sprint's informal agreement in his calculations, rather 7 than the higher rates from the AT&T agreement. This is clearly an aggressive 8 assumption given the informal nature of Sprint's agreement. Further, Mr. Canfield incorrectly claims that the impact of AT&T agreement is "almost identical"⁷³ to the 9 impact of the Sprint agreement. Given that some of the rates under the AT&T agreement 10 are as high as *** xxxxxx *** the rates of Sprint's agreement, 74 the alleged impact 11 12 would be significantly different (smaller) under the AT&T rates than under Sprint's rates.75 13

⁷¹ Mr. Brotherson's confidential exhibit LBB-11, pp. 6-7.

Specifically, as shown in Ankum's Confidential Exhibit 2 (restatement of Mr. Canfield's calculations for Eschelon), Tab "Billing," cells C56:F57, AT&T rates would be approximately in the range of *** xxxxxxxx*** for originating and *** xxxxxx *** for terminating minutes depending on the bill date.

⁷³ Canfield Direct, p. 21.

⁷⁴ See footnote above.

The abbreviated format of Mr. Canfield's workbook (Qwest's data responses to Joint CLECs 1st Set, Request No. 3, confidential attachment D) does not permit a formal restatement of his workbook: The workbook contains volumes aggregated over long periods of time, while the restatement would require the volumes data for sub-periods to properly capture changes in AT&T rates over time.

WOULD MR. CANFIELD'S ESTIMATES OF ALLEGED OVERCHARGES 1 Q. 2 CHANGE IF YOU CORRECT THE ABOVE DISCUSSED ERRORS? 3 Again, I stress that I do not agree with the relevance of Mr. Canfield's analysis A. Yes. 4 and perform these calculations only to show that his estimates are grossly overstated even from the standpoint of his declared approach. Re-stating Mr. Canfield's analysis to 5 6 correct the above discussed errors changes the alleged overcharges estimates as follows: For Eschelon, the estimate decreased from *** xxxxxxxx*** to *** xxxxxxxx ****⁷⁶; 7 for XO, the estimate decreased from *** xxxxxxx *** to *** xxxxxx ***. 8 9 Q. EVEN IF THE COMMISSION WERE TO FIND THAT THE OFF-TARIFF 10 AGREEMENTS WERE DISCRIMINATORY, WOULD THE PROPER REMEDY BE TO HAVE THE JOINT CLECS PAY QWEST? 11 12 A. No. Even if the Commission were to somehow find that the Agreements are discriminatory, then the proper remedy would be to make AT&T and Sprint pay the 13 14 tariffed rate. 15 Under Qwest's proposed solution presumably all other IXCs would be able to get refunds 16 as well. This would create a windfall for all IXCs simply due to AT&T's ability to force small CLECs into off-tariff agreements at the expense of the Joint CLECs, who may be 17

Note that a more straightforward and accurate implementation of Mr. Canfield's approach would be to take CLEC's monthly invoices to Qwest and recalculate the total billed amounts by using the rates AT&T paid during the same months.

In any event, XO would not responsible for damages calculated for Allegiance prior to April 2004.

left undercompensated. This is unfair and possibly confiscatory;⁷⁸ when the FCC 1 2 established the price cap regime for LECs, it explicitly recognized that below-cost rates 3 might be confiscatory: [A] price cap LEC may petition the Commission to set its rates above the 4 5 levels permitted by the price cap indices based on a showing that the authorized rate levels will produce earnings that are so low as to be 6 confiscatory. 79 (Emphasis added.) 7 8 Offering potentially all IXCs discounts off the CLECs tariffs may prevent CLECs from 9 recovering their legitimately incurred costs for offering access services. Again, this is 10 potentially confiscatory (as a matter of economics.) It will also be a permanent drain on 11 CLEC resources which will invariably curtail the CLECs' ability to expand their 12 networks and compete vigorously, to the ultimate detriment of telecom markets and end user customers in Colorado. 13 VII. CONCLUSION 14 Q. PLEASE SUMMARIZE YOUR TESTIMONY. 15 In this testimony I have demonstrated that any Joint CLECs agreements with carriers, 16 A. 17 such as AT&T and Sprint, are consistent with the spirit of FCC and Commission rules 18 and regulations and, thus, Qwest cannot reasonably argue to have been harmed by the

I am using this term not as a legal concept but as in common parlance.

Access Charge Reform, Price Cap Performance Review for Local Exchange Carriers, CC Docket Nos. 96-262 and 94-1, Sixth Report and Order, Low-Volume Long Distance Users, CC Docket No. 99-249, Report and Order, Federal-State Joint Board on Universal Service, CC Docket No. 96-45, Eleventh Report and Order, 15 FCC Rcd 12962 (2000) (hereafter "CALLS Order"), ¶ 17.

1	existence of such agreements. Further, I have demonstrated that Qwest has made no
2	meaningful quantitative demonstration of the extent to which it is been harmed and that
3	Mr. Canfield's calculations are no measure of Qwest's alleged loss of competitiveness.
4	Last, I have demonstrated that Mr. Canfield's calculations contain serious errors and
5	should not be relied on for any purpose.

6 Q. DOES THIS CONCLUDE YOUR TESTIMONY?

7 A. Yes, it does.
